5465. Number of Nodes in the Sub-Tree With the Same Label

sions (/contest/weekly-contest-198/problems/number-of-nodes-in-the-sub-tree-with-the-same-label/submissions/)

ıtest (/contest/weekly-contest-198/)

Given a tree (i.e. a connected, undirected graph that has no cycles) consisting of `n` nodes numbered from `0` to `n - 1` and exactly `n - 1` `edges`. The **root** of the tree is the node `0`, and each node of the tree has **a label** which is a lower-case character given in the string `labels` (i.e. The node with the number `i` has the label `labels[i]`).

The `edges` array is given on the form `edges[i] = [a_i, b_i]`, which means there is an edge between nodes a_i and b_i in the tree.

Return *an array of size `n`* where `ans[i]` is the number of nodes in the subtree of the i^{th} node which have the same label as node `i`.

A subtree of a tree `T` is the tree consisting of a node in `T` and all of its descendant nodes.

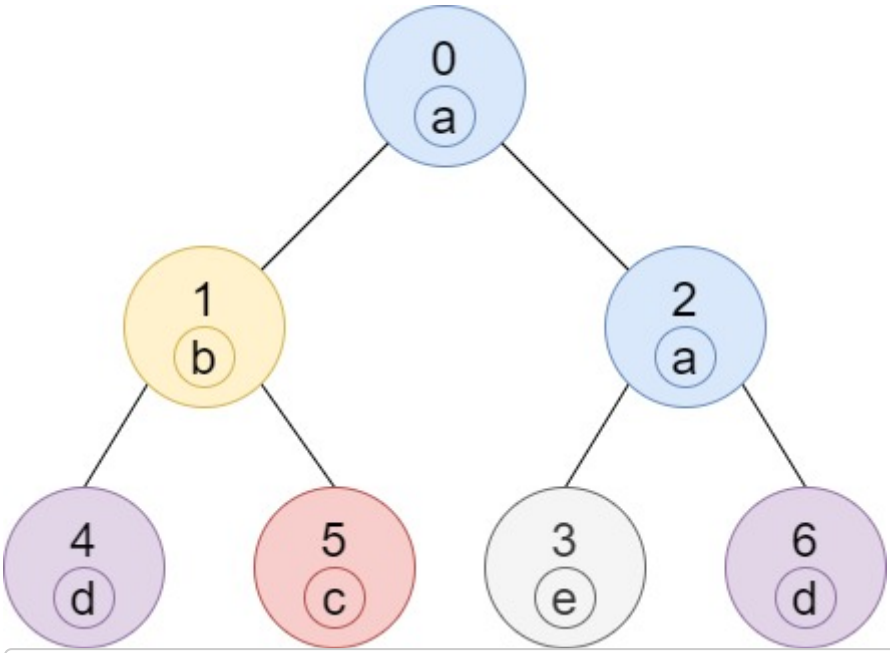
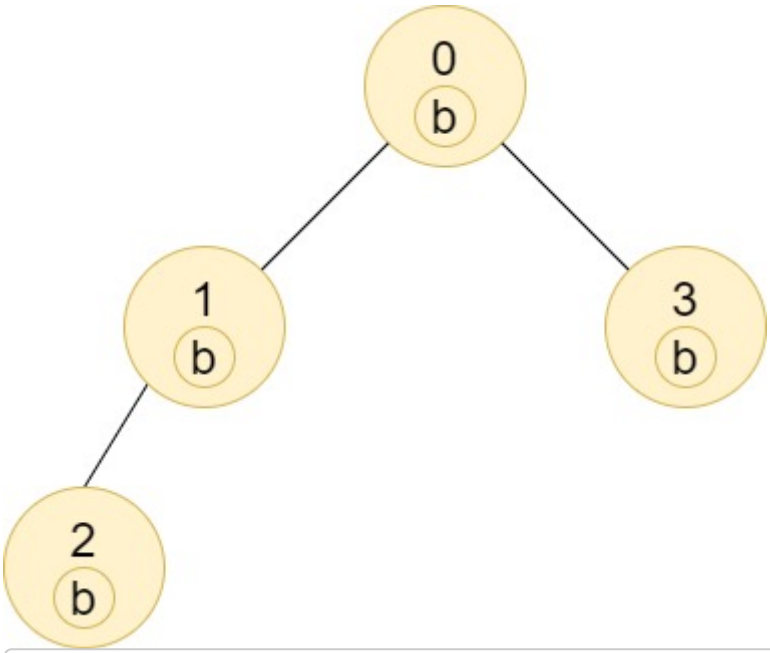
Example 1:



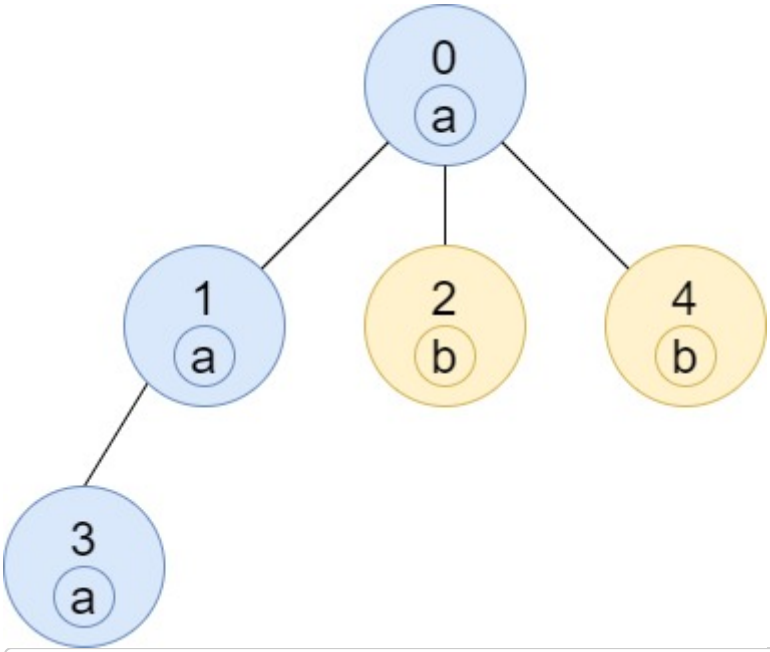
```
Input: n = 7, edges = [[0,1],[0,2],[1,4],[1,5],[2,3],[2,6]], labels = "abaedcd"
Output: [2,1,1,1,1,1,1]
Explanation: Node 0 has label 'a' and its sub-tree has node 2 with label 'a' as well, thus
Node 1 has a label 'b'. The sub-tree of node 1 contains nodes 1,4 and 5, as nodes 4 and 5
```

Example 2:



```
Input: n = 4, edges = [[0,1],[1,2],[0,3]], labels = "bbbb"
Output: [4,2,1,1]
Explanation: The sub-tree of node 2 contains only node 2, so the answer is 1.
The sub-tree of node 3 contains only node 3, so the answer is 1.
The sub-tree of node 1 contains nodes 1 and 2, both have label 'b', thus the answer is 2.
The sub-tree of node 0 contains nodes 0, 1, 2 and 3, all with label 'b', thus the answer i
```

Example 3:



```
Input: n = 5, edges = [[0,1],[0,2],[1,3],[0,4]], labels = "aabab"
Output: [3,2,1,1,1]
```

Example 4:

```
Input: n = 6, edges = [[0,1],[0,2],[1,3],[3,4],[4,5]], labels = "cbabaa"
Output: [1,2,1,1,2,1]
```

Example 5:

```
Input: n = 7, edges = [[0,1],[1,2],[2,3],[3,4],[4,5],[5,6]], labels = "aaabaaa"
Output: [6,5,4,1,3,2,1]
```

Constraints:

- `1 <= n <= 10^5`
- `edges.length == n - 1`
- `edges[i].length == 2`
- `0 <= a_i, b_i < n`
- `a_i != b_i`
- `labels.length == n`
- `labels` is consisting of only of lower-case English letters.

JavaScript

```
/**
 * @param {number} n
 * @param {number[][]} edges
 * @param {string} labels
 * @return {number[]}
 */
var countSubTrees = function(n, edges, labels) {

};
```
