5500. Maximum Length of Subarray With Positive Product

iissions (/contest/weekly-contest-204/problems/maximum-length-of-subarray-with-positive-product/submissions/)

Contest (/contest/weekly-contest-204/)

Given an array of integers `nums`, `find` the maximum length of a subarray where the product of all its elements is positive.

A subarray of an array is a consecutive sequence of zero or more values taken out of that array.

Return *the maximum length of a subarray with positive product*.

Difficulty:	Medium

Example 1:

```
Input: nums = [1,-2,-3,4]
Output: 4
Explanation: The array nums already has a positive produ
```

Example 2:

```
Input: nums = [0,1,-2,-3,-4]
Output: 3
Explanation: The longest subarray with positive product is [1,-2,-3] which has a product o
Notice that we cannot include 0 in the subarray since that'll make the product 0 which is
```

Example 3:

```
Input: nums = [-1,-2,-3,0,1]
Output: 2
Explanation: The longest subarray with positive product is [-1,-2] or [-2,-3].
```

Example 4:

```
Input: nums = [-1,2]
Output: 1
```

Example 5:

```
Input: nums = [1,2,3,5,-6,4,0,10]
Output: 4
```

Constraints:

- `1 <= nums.length <= 10^5`
- `-10^9 <= nums[i] <= 10^9`

JavaScript

```
/**
 * @param {number[]} nums
 * @return {number}
 */
var getMaxLen = function(nums) {

};
```
