

5445. Range Sum of Sorted Subarray Sums

[My Submissions \(/contest/biweekly-contest-30/problems/range-sum-of-sorted-subarray-sums/submissions/\)](#)

[Back to Contest \(/contest/biweekly-contest-30/\)](#)

Given the array `nums` consisting of `n` positive integers. You computed the sum of all non-empty continuous subarrays from the array and then sort them in non-decreasing order, creating a new array of $n * (n + 1) / 2$ numbers.

Return the sum of the numbers from index `left` to index `right` (indexed from 1), inclusive, in the new array. Since the answer can be a huge number return it modulo $10^9 + 7$.

Difficulty: Medium

Example 1:

Input: `nums = [1,2,3,4]`, `n = 4`, `left = 1`, `right = 5`

Output: 13

Explanation: All subarray sums are 1, 3, 6, 10, 2, 5, 9, 3, 7, 4. After sorting them in non-decreasing order, we have the new array [1, 2, 3, 3, 4, 5, 6, 7, 9, 10]. The sum of the numbers from index 1 to index 5 is 1 + 2 + 3 + 3 + 4 = 13.

Example 2:

Input: `nums = [1,2,3,4]`, `n = 4`, `left = 3`, `right = 4`

Output: 6

Explanation: The given array is the same as example 1. We have the new array [1, 2, 3, 3, 4, 5, 6, 7, 9, 10]. The sum of the numbers from index 3 to index 4 is 3 + 3 = 6.

Example 3:

Input: `nums = [1,2,3,4]`, `n = 4`, `left = 1`, `right = 10`

Output: 50

Constraints:

- $1 \leq \text{nums.length} \leq 10^3$
- $\text{nums.length} == n$
- $1 \leq \text{nums}[i] \leq 100$
- $1 \leq \text{left} \leq \text{right} \leq n * (n + 1) / 2$

JavaScript

1 //**

```
2  * @param {number[]} nums
3  * @param {number} n
4  * @param {number} left
5  * @param {number} right
6  * @return {number}
7  */
8  const rangeSum = (nums, n, left, right) => {
9      let data = [];
10     for (let i = 0; i < nums.length; i++) {
11         for (let j = i + 1; j <= nums.length; j++) {
12             let subarr = nums.slice(i, j)
13             data.push(sum(subarr));
14         }
15     }
16     data.sort((a, b) => a - b);
17     let res;
18     res = data.slice(left - 1, right);
19     return sum(res) % 1000000007;
20 };
21
22 const sum = (arr) => {
23     return arr.reduce((acc, cur) => acc + cur);
24 };
```
