

5661. Latest Time by Replacing Hidden Digits

My Submissions (/contest/weekly-contest-225/problems/latest-time-by-replacing-hidden-digits/submissions/)

Back to Contest (/contest/weekly-contest-225/)

You are given a string `time` in the form of `hh:mm`, where some of the digits in the string are hidden (represented by `?`).

The valid times are those inclusively between `00:00` and `23:59`.

Return the latest valid time you can get from `time` by replacing the hidden digits.

Difficulty:	Easy

Example 1:

Input: `time = "2?:?0"`
Output: `"23:50"`
Explanation: The latest hour beginning with the digit '2' is 23 and the latest minute ending with

Example 2:

Input: `time = "0?:3?"`
Output: `"09:39"`

Example 3:

Input: `time = "1?:22"`
Output: `"19:22"`

Constraints:

- `time` is in the format `hh:mm`.
- It is guaranteed that you can produce a valid time from the given string.

JavaScript

```
1 /**
2  * @param {string} time
3  * @return {string}
4  */
5 var maximumTime = function(time) {
6
7 };
```
