5815. Maximum Number of Points with Cost

My Submissions (/contest/weekly-contest-250/problems/maximum-number-of-points-with-cost/submissions/)

Back to Contest (/contest/weekly-contest-250/)

You are given an $m \times n$ integer matrix points (**0-indexed**). Starting with 0 points, you want to **maximize** the number of points you can get from the matrix.

To gain points, you must pick one cell in **each row**. Picking the cell at coordinates (r, c) will **add** points[r][c] to your score.

However, you will lose points if you pick a cell too far from the cell that you picked in the previous row. For every two adjacent rows $\, r \,$ and $\, r \, + \, 1 \,$ (where $\, 0 \, <= \, r \, < \, m \, - \, 1 \,$), picking cells at coordinates $\, (\, r \, , \, c_1 \,) \,$ and $\, (\, r \, + \, 1 \, , \, c_2 \,) \,$ will **subtract** abs($\, c_1 \, - \, c_2 \,) \,$ from your score.

User Accepted:	0

Difficulty:	Medium

Return the **maximum** number of points you can achieve.

abs(x) is defined as:

- x for x >= 0.
- -x for x < 0.

Example 1:

1	2	3
1	5	1
3	1	1

Input: points = [[1,2,3],[1,5,1],[3,1,1]]

Output: 9
Explanation:

The blue cells denote the optimal cells to pick, which have coordinates (0, 2), (1, 1), and (2, 1), and (3, 1) are the coordinates (0, 2), (1, 1), and (2, 1) and (3, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (1, 1), and (2, 1) are the coordinates (0, 2), (2, 1) are the coordinates (0, 2), (2, 1), and (2, 1) are the coordinates (2, 1) are the coord

However, you must subtract abs(2-1) + abs(1-0) = 2 from your score.

Your final score is 11 - 2 = 9.

Example 2:
