5722. Truncate Sentence

My Submissions (/contest/weekly-contest-235/problems/truncate-sentence/submissions/) Back to Contest (/contest/weekly-contest-235/) A sentence is a list of words that are separated by a single space with no leading or trailing spaces. Each of the words User Accepted: 0 consists of **only** uppercase and lowercase English letters (no punctuation). User Tried: 0 • For example, "Hello World", "HELLO", and "hello world hello world" are all sentences. You are given a sentence s and an integer k. You want to truncate s such that it contains only the first k words. Return Total Accepted: 0 s after truncating it. **Total Submissions:** 0 Difficulty: (Easy)

Example 1:

```
Input: s = "Hello how are you Contestant", k = 4
Output: "Hello how are you"
Explanation:
The words in s are ["Hello", "how" "are", "you", "Contestant"].
The first 4 words are ["Hello", "how", "are", "you"].
Hence, you should return "Hello how are you".
```

Example 2:

```
Input: s = "What is the solution to this problem", <math>k = 4
Output: "What is the solution"
Explanation:
The words in s are ["What", "is" "the", "solution", "to", "this", "problem"].
The first 4 words are ["What", "is", "the", "solution"].
Hence, you should return "What is the solution".
```

Example 3:

```
Input: s = "chopper is not a tanuki", k = 5
Output: "chopper is not a tanuki"
```

Constraints:

- 1 <= s.length <= 500
- k is in the range [1, the number of words in s].
- s consist of only lowercase and uppercase English letters and spaces.
- The words in s are separated by a single space.
- There are no leading or trailing spaces.
