5960. Capitalize the Title

| My Submissions (/contest/biweekly-contest-69/problems/capitalize-the-title/submissions/) | Back to Contest (/contest/biweekly-contest-69/) |

You are given a string `title` consisting of one or more words separated by a single space, where each word consists of English letters. **Capitalize** the string by changing the capitalization of each word such that:

- If the length of the word is `1` or `2` letters, change all letters to lowercase.
- Otherwise, change the first letter to uppercase and the remaining letters to lowercase.

Return *the **capitalized** `title`.

Difficulty:	Easy

Example 1:

```
Input: title = "capiTalIze tHe titLe"
Output: "Capitalize The Title"
Explanation:
Since all the words have a length of at least 3, the first letter of each word is uppercase, and the remaining letters
```

Example 2:

```
Input: title = "First leTTeR of EACH Word"
Output: "First Letter of Each Word"
Explanation:
The word "of" has length 2, so it is all lowercase.
The remaining words have a length of at least 3, so the first letter of each remaining word is uppercase, and the rema
```

Example 3:

```
Input: title = "i lOve leetcode"
Output: "i Love Leetcode"
Explanation:
The word "i" has length 1, so it is lowercase.
The remaining words have a length of at least 3, so the first letter of each remaining word is uppercase, and the rema
```

Constraints:

- `1 <= title.length <= 100`
- `title` consists of words separated by a single space without any leading or trailing spaces.
- Each word consists of uppercase and lowercase English letters and is **non-empty**.

Java ▾

```java
class Solution {
    public String capitalizeTitle(String title) {

    }
}
```
