557. Reverse Words in a String III

👍 374   👎 35   ♡   ▾

📑 Description (/problems/reverse-words-in-a-string-iii/description/) | 💡 Hints (/problems/revers

📔 Notes

🔀 Pick One (/problems/random-one-question/)

Given a string, you need to reverse the order of characters in each word within a sentence while still preserving whitespace and initial word order.

Example 1:

```
Input: "Let's take LeetCode contest"
Output: "s'teL ekat edoCteeL tsetnoc"
```

Note: In the string, each word is separated by single space and there will not be any extra space in the string.

❓ Python   ▾   📄   ⟳   >_   ⚙

```python
class Solution(object):
    def reverseWords(self, s):
        list = s.split(" ")
        # print (list)
        # print (list[0])
        for i in range(len(list)):
            list[i] = list[i][::-1]
        new = " ".join(list)
        return new
```
